

## **TRANSPORTATION**

Statement of support for a second bridge: 1989 – Member concurrence.

1. We support action to promote a safe and environmentally sound highway system. This system should improve the well-being of the Stevens Point area and afford better access to housing and jobs with the least possible disturbance to owner-occupied residences.
2. Included in this system is the construction of a new bridge across the Wisconsin River that meets our preceding criteria.
3. As always, the League of Women Voters endorses open discussion and community input in arriving at appropriate decisions for the benefit of the area.
